

Gurleen Kaur Bali

8800362599 | gurleenkaurbali20@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile

Analytically driven graduate (CGPA: 9.50) with hands-on experience building and deploying end-to-end data and AI projects. Skilled in Python, SQL, Tableau, and Power BI, with a strong foundation in turning raw data into clear, actionable insights.

Education

Guru Gobind Singh Indraprastha University	2022 – 2025
Bachelor of Computer Applications	CGPA: 9.50
S.S. Mota Singh Sr. Sec. Model School	2022
Class XII (CBSE)	Percentage: 94.4%

Skills

Languages & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn	Dashboard Design, Trend Analysis
Data Analytics & BI: ETL, EDA, Data Wrangling, Data Preprocessing, KPI Computation, Excel, Jupyter Notebook	Deployment & Version Control: Git, GitHub, Vercel, Render, FastAPI, Streamlit
Data Visualization & Dashboarding: Tableau, Power BI,	Software Engineering: Modular Code Design, API Development, End-to-End Project Deployment

Experience & Training

Information Technology Trainee — Max Healthcare	Dec 2025 – Present
- Engineered an end-to-end Cyber Defense Reporting Dashboard consolidating data from 5+ security tools, replacing manual PowerPoint reports with a single unified view for management. - Designed and implemented a MySQL database with raw ingestion tables and KPI tables to structure and store operational security data. - Built Python scripts to automate KPI computation — including Total Alerts, Alerts by Severity/Type, Total Threats Detected, Quarantined Items, and Threats by Security Filter. - Performed data wrangling and preprocessing on Excel-based datasets to ensure clean, consistent input for the reporting pipeline. - Supported GRC and data privacy initiatives aligned with the Digital Personal Data Protection (DPDP) Act, 2023.	
Data Science Trainee — Shape MySkills	Jul – Aug 2024
- Performed end-to-end data preprocessing and feature engineering on structured datasets, including handling missing values, encoding, and normalization. - Conducted exploratory data analysis (EDA) to uncover patterns and relationships, supporting data-driven model evaluation and reporting.	

Projects

IPCheck — AI-Powered Suspicious IP Detection	Project Link Live Project
- Built an end-to-end IP log analytics tool that ingests CSV-based server logs, processes and classifies IPs as suspicious or normal, and visualizes results on an interactive map. - Developed a FastAPI backend to handle automated log ingestion, data preprocessing, and real-time risk scoring pipeline. - Deployed a full-stack solution using Vercel + Render, enabling scalable and accessible threat monitoring for any log dataset.	
RAG-Based Personal Portfolio Chatbot	Project Link Live Project
- Built a personalized RAG-based portfolio chatbot enabling natural language Q&A about projects, skills, and experience using a structured JSON knowledge base. - Implemented semantic search with FAISS and SentenceTransformers for context-aware retrieval, integrated with Cohere Command R+ LLM for natural response generation. - Deployed an interactive Streamlit frontend with persistent chat history and quick-question buttons.	

Certifications

Oracle Cloud Infrastructure Generative AI Professional	Badge
Career Essentials in Generative AI — Microsoft & LinkedIn	Certificate
Data Science Job Simulation — British Airways, Forage	Certificate
